

Science

WRENINGHAM VC PRIMARY - CURRICULUM
KNOWLEDGE AND KEY SKILLS PROGRESSION

Science

INTENT

At Wreningham we teach science following the 2014 national curriculum and we intend to

- Stimulate curiosity, awe and wonder of the scientific world.
- Encourage the children to ask WHY!
- Give the children the thinking and practical skills to be effective scientists.
- Develop scientific knowledge and conceptual understanding of the physical and natural world.
- Equip children with accurate scientific vocabulary and the ability to use it effectively.
- Develop critical thinking skills in relation to the physical and natural world around them.

IMPLEMENTATION

- The acquisition of key scientific knowledge is an integral part of our science lessons.
- Science will be taught in planned blocks by the class teacher.
- We teach specific scientific vocabulary for each science topic.
- Previous related topic vocabulary is recapped.
- We provide problem solving opportunities and give children the chance to ask their own questions and use their scientific skills and research to discover the answers.
- Teachers demonstrate how to use scientific equipment and working scientifically skills are embedded into lessons.
- Our curriculum is progressive. We build upon the learning and skills development of the previous years.
- Through enrichment days and LOtC, we promote the profile of science and create a culture of scientific enquiry.

IMPACT

- Children will have a love of science and be absorbed in their learning.
- Children will be able to demonstrate their scientific knowledge and skills with confidence.
- Most children will achieve at least age-related expectations.
- Children will be equipped with the skills and knowledge to progress confidently to KS3.
- Children will be confident in using scientific vocabulary.
- Children will be able to question scientific ideas and reflect on knowledge.
-

Science

Early Years Foundation Stage		Topics
Year R	<p><u>Characteristics of Effective Learning</u> Playing and exploring - Showing curiosity about objects, events (and people) -Engaging in open-ended activity -Taking a risk, engaging in new experiences, and learning by trial and error</p> <p><u>ELG Understanding the World: The World</u> Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p>	Minibeasts (insects) Animals Plants Ourselves Seasons and weather
National Curriculum Statutory requirements		Topics
Year 1	<p>Pupils should be taught to:</p> <p><u>Plants</u> -Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees -Identify and describe the basic structure of a variety of common flowering plants, including trees</p> <p><u>Animals, including humans</u> -Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals -Identify and name a variety of common animals that are carnivores, herbivores and omnivores -Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) -Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</p> <p><u>Everyday materials</u> -Distinguish between an object and the material from which it is made -Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock -Describe the simple physical properties of a variety of everyday materials -Compare and group together a variety of everyday materials on the basis of their simple physical properties</p> <p><u>Seasonal changes</u> -Observe changes across the four seasons -Observe and describe weather associated with the seasons and how day length varies</p>	<p><u>Year 1/2 cycle 1</u> Animals including humans Living Things & their Habitats Everyday Materials Plants Animals including humans</p>

Science

National Curriculum Statutory requirements		Topics
Lower key stage 2 - Year 3	<p>Pupils should be taught to:</p> <p><u>Plants</u></p> <ul style="list-style-type: none"> -Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers -Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant -Investigate the way in which water is transported within plants -Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal <p><u>Animals, including humans</u></p> <ul style="list-style-type: none"> -Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat -Identify that humans and some other animals have skeletons and muscles for support, protection and movement <p><u>Rocks</u></p> <ul style="list-style-type: none"> -Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties -Describe in simple terms how fossils are formed when things that have lived are trapped within rock -Recognise that soils are made from rocks and organic matter <p><u>Light</u></p> <ul style="list-style-type: none"> -Recognise that they need light in order to see things and that dark is the absence of light -Notice that light is reflected from surfaces -Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by an opaque object -Find patterns in the way that the size of shadows change <p><u>Forces and Magnets</u></p> <ul style="list-style-type: none"> - compare how things move on different surfaces -Notice that some forces need contact between two objects, but magnetic forces can act at a distance -Observe how magnets attract or repel each other and attract some materials and not others -Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials -Describe magnets as having two poles -Predict whether two magnets will attract or repel each other, depending on which poles are facing 	<p><u>Year 3/4 cycle 1</u></p> <p>States of Matter</p> <p>Electricity</p> <p>Rocks</p> <p>Holt Hall</p> <p>Living Things & their Habitats</p> <p>Animals including Humans</p>

Science

National Curriculum Statutory requirements		Topic
Lower key stage 2 - Year 4	<p>Pupils should be taught to:</p> <p><u>Living things and their habitats</u></p> <ul style="list-style-type: none"> -Recognise that living things can be grouped in a variety of ways -Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment -Recognise that environments can change and that this can sometimes pose dangers to living things <p><u>Animals, including humans</u></p> <ul style="list-style-type: none"> -Describe the simple functions of the basic parts of the digestive system in humans -Identify the different types of teeth in humans and their simple functions -Construct and interpret a variety of food chains, identifying producers, predators and prey <p><u>States of matter</u></p> <ul style="list-style-type: none"> -Compare and group materials together, according to whether they are solids, liquids or gases -Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) -Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. <p><u>Sound</u></p> <ul style="list-style-type: none"> -Identify how sounds are made, associating some of them with something vibrating -Recognise that vibrations from sounds travel through a medium to the ear -Find patterns between the pitch of a sound and features of the object that produced it -Find patterns between the volume of a sound and the strength of the vibrations that produced it -Recognise that sounds get fainter as the distance from the sound source increases <p><u>Electricity</u></p> <ul style="list-style-type: none"> -Identify common appliances that run on electricity -Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers -Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery -Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit -Recognise some common conductors and insulators, and associate metals with being good conductors 	<p><u>Year 3/4 cycle 2</u></p> <p>States of Matter</p> <p>Animals including humans</p> <p>Sound</p> <p>Forces and Magnets</p> <p>How Hill</p> <p>Plants</p> <p>Animals including Humans</p> <p>Light</p> <p>Health and Well Being</p>

Science

National Curriculum Statutory requirements		Topics
Upper key stage 2 - Year 5	<p>Pupils should be taught to:</p> <p><u>Living things and their habitats</u></p> <ul style="list-style-type: none"> -Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird -Describe the life process of reproduction in some plants and animals <p><u>Animals, including humans</u></p> <ul style="list-style-type: none"> -Describe the changes as humans develop to old age <p><u>Properties and changes of materials</u></p> <ul style="list-style-type: none"> -Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets -Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution -Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating -Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic -Demonstrate that dissolving, mixing and changes of state are reversible changes -Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda <p><u>Earth and space</u></p> <ul style="list-style-type: none"> -Describe the movement of the Earth, and other planets, relative to the Sun in the solar system -Describe the movement of the Moon relative to the Earth -Describe the Sun, Earth and Moon as approximately spherical bodies -Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky <p><u>Forces</u></p> <ul style="list-style-type: none"> -Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object -Identify the effects of air resistance, water resistance and friction, that act between moving surfaces -Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect 	<p><u>Year 5/6 cycle 1</u></p> <p>Light</p> <p>Electricity</p> <p>Animals incl. humans(y6)</p> <p>Properties and changes of materials</p> <p>Evolution and inheritance</p> <p>Living things and their habitats (y6)</p>

Science

National Curriculum Statutory requirements		Topics
Upper key stage 2 - Year 6	<p><u>Living things and their habitats</u></p> <ul style="list-style-type: none"> -Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals -Give reasons for classifying plants and animals based on specific characteristics <p><u>Animals, including humans</u></p> <ul style="list-style-type: none"> -Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood -Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function -Describe the ways in which nutrients and water are transported within animals, including humans <p><u>Evolution and inheritance</u></p> <ul style="list-style-type: none"> -Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago -Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents -Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution <p><u>Light</u></p> <ul style="list-style-type: none"> -Recognise that light appears to travel in straight lines -Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye -Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes -Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them <p><u>Electricity</u></p> <ul style="list-style-type: none"> -Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit -Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches -Use recognised symbols when representing a simple circuit in a diagram 	<p><u>Year 5/6 cycle 2</u></p> <p>Earth and Space</p> <p>Forces</p> <p>Living things and habitats (y5)</p> <p>Animals including humans (y5)</p>

Science

Knowledge & Understanding					
Year R	<p><u>Momentous Moments</u></p> <p>Animals including human</p> <ul style="list-style-type: none"> -identify humans and other animals -name parts of the body -learn the senses -Similarities and differences -Animals and their young 		<p><u>Traditional Tales</u></p> <p>Collection of different objects made of different materials- observe, describe, sorting, label</p> <p>Introduce, discuss related vocab- hard, soft, stretchy, etc.</p> <p>Material hunt around the school.</p> <p>Fair testing- Which materials are waterproof?</p> <p>Which materials keep things warm?</p>	<p><u>Under the Sea</u></p> <p>Plants</p> <ul style="list-style-type: none"> -identify and name a variety of wild and garden plants including deciduous and evergreen trees Identify and describe the structure of a variety of common flowering plants and trees. 	<p><u>Under the Sea</u></p> <p>Name common animals including fish, mammals, amphibians, birds and reptiles</p> <ul style="list-style-type: none"> -Identify that most living things live in habitats to which they are suited. -Describe how different habitats provide the basic needs of different kinds of animals and plants and how they depend on each other.
	<p><u>Brilliant Books</u></p> <p>Seasonal Changes</p> <ul style="list-style-type: none"> -identify changes in seasons using senses (go on walks) -Watch videos, paint etc signs of each season. - learn about harvest -names of the months and the seasons. -Different weather and what would you wear. 	<p><u>Brilliant Books</u></p> <p>Habitats</p> <ul style="list-style-type: none"> -(Based on the book we're going on a bear hunt) Talk about where brown bears live. Begin to name and identify different bears from around the world Begin to identify the different habitats that bears live in. 	<p><u>Take one Picture</u></p> <p>Forces</p> <p>Pushes and pulls</p> <ul style="list-style-type: none"> -Explore how we move (ourselves, each other, toys, Victorian toys etc) -Use words such as push, pull, forward, backwards. -make toys to learn about wind power, pushing, pulling. -to know that pushing and pulling will effect movement -explore magnets <p><u>Every day materials</u></p> <ul style="list-style-type: none"> -Know how shapes of materials can be changed by stretching, bending, twisting and stretching 	<p><u>Our Wonderful World</u></p> <p>Plants</p> <ul style="list-style-type: none"> -find out what plants need to survive -plant and grow plants from seeds -Look at similarities and differences between plants. Flowers, seeds etc 	<p><u>Our Wonderful World</u></p> <p>Animals including humans</p> <ul style="list-style-type: none"> -Look at animals from a variety of habitat (rainforest, hot and cold deserts etc) -Find out about what they eat, how they look after their young etc -learn about the threats to the animals -lifecycle of animals <p>NC Unit: Living Things & their Habitats</p>

Science

<p>Year 1/2</p>	<p>NC Unit: Animals including humans -Identify and name different animals including humans. -identify name, draw and label the basic parts of the human body -Say which parts is associated with the senses Notice that animals including humans have offspring that grow into adults -Find out about and describe the basic needs of animals including humans for survival -Describe how to be healthy and live a healthy lifestyle. (exercise, food, hygiene)</p>	<p>BI: Materials are used in different ways according to their properties KQ: How do you know a material is fit for purpose? Everyday Materials -identify and name different materials according to properties (sorting games/activities) -Group materials depending on their properties -begin to talk about how materials are used -give reasons why materials are used.</p>	<p>NC Unit: Plants Big Idea: There is a relationship between structure and function - every flower part has a job to do. KQ: How do you identify trees and plants? -Identify and describe the structure of a variety of common flowering plants and trees. -Know there are different varieties of plants, but they all have common features -identify and name a variety of wild and garden plants including deciduous and evergreen trees</p>	<p>NC Unit: Living Things & their Habitats BI: Organisms including plants and animals have characteristics that make it possible for them to survive in their habitat KQ: How have animals adapted to their habitats? -Name common animals including fish, mammals, amphibians, birds and reptiles -Identify that most living things live in habitats to which they are suited. -Describe how different habitats provide the basic needs of different kinds of animals and plants and how they depend on each other.</p>
-----------------	--	--	--	--

Science

	<p>NC Unit - Seasonal Changes Big Idea: The Earth is one of eight planets that orbit the sun. The Earth is tilted and spins on its axis leading to day and night, the seasons and the climate. KQ:</p> <ul style="list-style-type: none"> -identify changes across the 4 seasons (observations) -Observe and describe the weather linked with the seasons and how the length of the day changes -identify suitable clothes for each season <p>Animals including humans</p> <ul style="list-style-type: none"> -identify and name a variety of common animals that are carnivores, herbivores, and omnivores. - Begin to separate animals based on their structure (has wings does not have wings, has 0 legs, 2 legs 4 legs or more than 4 legs) Use names reptile, insect, amphibian, birds, mammals. 	<p>Use of Everyday Materials The arrangement, movement and type of the building blocks of matter and the forces that hold them together or push them apart explain all the properties of matter. (hot/cold, soft/hard, light/heavy etc)</p> <ul style="list-style-type: none"> -Know how shapes of materials can be changed by stretching, bending, twisting and stretching 	<p>NC Uni - Animals including humans Big Idea: The different kinds of life, animals, plants and microorganisms, have evolved over millions of generations into different forms in order to survive in the environments in which they live. KQ What other types of living things are there?</p> <ul style="list-style-type: none"> -identify and name a variety of common animals that are carnivores, herbivores, and omnivores. - Begin to separate animals based on their structure (has wings does not have wings, has 0 legs, 2 legs 4 legs or more than 4 legs) Use names reptile, insect, amphibian, birds, mammals. 	<p>NC Unit - Living Things & their Habitats Big Idea: The different kinds of life, animals, plants and microorganisms, have evolved over millions of generations into different forms in order to survive in the environments in which they live. KQ: Can living things stay healthy and live forever?</p> <ul style="list-style-type: none"> Explore and compare the differences between things that are living, dead and never been alive Identify that most living things live in habitats to which they are suited. Describe how different habitats provide the basic needs of different kinds of animals and plants and how they depend on each other. Identify and name a variety of plants and animals in their habitats including micro habitats. Describe how animals get their food from plants and other animals- explore food chains. 	<p>NC Unit Plants KQ: What is alive, dead or was never alive?</p> <ul style="list-style-type: none"> -Observe and describe how seeds and bulbs grow into mature plants -plant and grow flowers and plants from seeds -Find out about and describe what a plant needs to grow and stay healthy.
<p>Year 3/4</p>	<p>NC Unit - States of Matter Big Idea: All matter in the Universe is made of very small particles.</p> <ul style="list-style-type: none"> -Compare and group solids, liquids and gases -Pupils observe changes of state when materials are heated or cooled and investigate what happens to the 	<p>NC Unit- Electricity KQ: what pieces of equipment might you use to make an electrical circuit? Big idea: you need electricity to make electrical circuits work and this impacts on our everyday lives.</p> <ul style="list-style-type: none"> -Identify appliances that run on electricity 	<p>NC Unit - Rocks KQ: Are rocks all the same? Big idea: Through observing and investigating properties we create scientific groups.</p> <ul style="list-style-type: none"> -Classification of rocks by comparing and grouping together different types 	<p>NC Unit - Animals including Humans Big Idea: Food is a source of energy. All animals need food to provide energy. KQ: What do our bodies do with the food we eat?</p> <ul style="list-style-type: none"> -The digestive system is the system for digestion in the human body, it describes how we break down our food -Teeth 	<p>NC Unit - Living Things & their Habitats Big idea: recognise that living things can be grouped in a variety of ways</p> <p>-Big Idea: Classifying and grouping things can help support our scientific understanding</p>

Science

<p>temperature in degree Celcius -Water Cycle</p>		<p>-Construct simple circuits -Switches -Conductors/insulators (ex: what could we make to keep this ice cube an ice cube for as long as possible?)</p>	<p>-The purpose of different types of rocks -Fossils: how are they formed, -Soils: know it is made from rocks and organic matter Person: Mary Anning</p>	<p>-Digestive system- mouth, tongue, teeth, oesophagus, stomach, and small and large intestine -Food Chains (producers, predators & prey) -Herbivore, Omnivore, Carnivore</p>	<p>KQ: How can living things be grouped? -Grouping living things. - A classification key is a tool that is used to group living things to help us identify them. -Recognise that environments can change. - Habitats can change throughout the year and this can have an effect on the plants and animals that live there. - Humans can have positive and negative effects on the environment.</p>
<p>NC Unit - States of Matter Big Idea: All matter in the Universe is made of very small particles. KQ: Is water always wet? -Identifying solids, liquids and gases. -Solids hold their shape; liquids form a pool not a pile; gases escape from an unsealed container. -Explore water in each of the three states; how you know which one is which -On a molecular scale, what is the difference between the three states of matter</p>	<p>NC Unit - Animals Including Humans <i>Healthy Eating</i> Big Idea: Food is a source of energy. All animals need food to provide energy. KQ: How do living things work? - Animals cannot make their own food; they get nutrition from what they eat. to understand that humans get the nutrition they need from the food they eat and the importance of a balanced diet <i>Skeletons and muscles</i> -humans and animals -to investigate how the skeleton supports and protects the body</p>	<p>NC Unit - Forces and Magnets Big Idea: Matter is all the stuff, or mass, in the universe. Forces are different kinds of pushes and pulls that act on all the matter that is in the universe. KQ: What can magnets do? -Compare how things move on different surfaces -Magnets -Newton: what is it and how do we measure it</p>	<p>NC Unit –Sound Big Idea: Both light and sound are forms of energy that move in waves. Understanding waves helps us to communicate, explore the universe, and transfer energy to where we want it. KQ: How do we hear different sounds? -Identify how sounds are made -Sound as vibrations that travel to the ear -Pitch/volume -The pitch and volume of sounds can be changed in a variety of ways.</p>	<p>NC Unit – Plants Big Idea: There is a relationship between structure and function - every flower part has a job to do. KQ: What do living things need to survive? -Functions of different parts of flowering plants -How water is transported within plants -Life cycles of flowering plants -Requirements of plants for life and growth</p>	<p>NC Unit - Light Big Idea: Dark is the absence of light. KQ: What is the dark? -Sources of light -Shadows and reflections -light is reflected from surfaces. -To understand the sun can be dangerous and how best to protect ourselves. -If there is no light from a light source, it will be dark.</p>

Science

	-Practical experiment: what happens when we heat solids and liquids (eg. crayon shavings, honey, etc.) -Polymers	-to find out what muscles are and how skeletal muscles help us move				
Year 5/6	<p>NC Unit Light Big Idea: We can use evidence found in practical experiments to support an idea in science</p> <p>KQ: Are there rules which govern how light works?</p> <p>Prove light travels in straight lines using pinhole camera designs. Show how shadows are created, Find out how light is reflected using mirrors and periscopes and prove this with an experiment. Show how light travels from light sources to our eyes. Find out how light can be bent and split – find out how a rainbow is made and design an experiment to show light is made up of different colours.</p>	<p>NC Unit Electricity Big Idea: Planning and carrying out an enquiry by changing a variable can answer a scientific question</p> <p>KQ: How does changing a circuit affect what is observed?</p> <p>Learn what electricity is and how is it related to electrons What is voltage and current and how do batteries work. Investigate brightness of a lamp and how it's affected by voltage of cells Find out how a bulb works</p> <p>Use recognised symbols when representing a simple circuit in a diagram and create circuit diagrams to represent circuits made.</p>	<p>NC Unit Animals incl. humans(y6) Big Idea: Recording data and results in different ways can help explain our findings in a scientific enquiry</p> <p>KQ: How does exercise affect how the human body operates</p> <p>– circ. system/health Learn about circulatory system/blood and put together and label a pop-up heart. Design an experiment to test how heart rate changes with exercise and represent the results using a spreadsheet and graphs. Learn about the impact of diet/ drugs on health.</p>	<p>NC Unit Properties and changes of materials(y5) Big Idea: Carrying out a fair test ensures that results are more accurate</p> <p>KQ: How do different materials react and change when subjected to different processes</p> <p>Compare and group materials based on properties (including solubility, hardness, conductivity, magnetic properties)</p> <p>Dissolving/solutions – predict and test soluble materials – which dissolves quickest Filtering/sieving – investigate which material make the best filter and record results graphically Everyday materials</p>	<p>NC Unit Evolution and inheritance Big Idea: Time can affect how living things can change in more, or less significant ways.</p> <p>KQ: Why may the offspring of living things be different from their parents</p> <p>Recognise that living things have changed over time – look at fossils and learn how they are made Recognise that living things produce offspring Identify how animals /plants are adapted to their environment</p> <p>Investigating variation in the classroom – height, hair colour, shoe size etc. Data collection and graph drawing to analyse.</p> <p>Predicting how humans might adapt over years to come based on new technologies and changes to the environment in which we live.</p>	<p>NC Unit Living things and their habitats (y6) Big Idea: Classifying and grouping things can help support our scientific understanding</p> <p>KQ: Why are certain characteristics significant in creating classification groups</p> <p>Learn how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals Learn about Linnaeus's classification system.</p> <p>Give reasons for classifying plants and animals based on specific characteristics – justify reasons for classifying unusual animals such as the duck-billed platypus.</p>
	NC Unit Earth and Space	NC Unit Forces	The Science of a Trip to Mars KQ: How can scientists solve the problems of a trip to Mars?	NC Unit Living Things and Their habitats (y5)	NC Unit Animals including humans-changes	

Science

<p>KQ: How are our watches and calendars related to the movements of earth in space? Big Idea: The movement of our planet is key to our experience of time.</p> <p>Investigating our own solar system. Learn about the mechanisms which result in earth having day and night and leap year every 4 years. Investigate how the moon interacts with the earth. Investigate why we have seasons and what would happen if the earth wasn't on a tilt.</p>	<p>KQ: How can we measure the forces we experience on earth? Big Idea: Forces influence our everyday life</p> <p>Explain that unsupported objects fall towards the Earth – gravity. Learn about Newton's laws of gravity Air resistance – design and testing of parachutes Investigate friction – design and testing of ramp vehicle Recognise mechanisms, e.g. levers, pulleys and gears, allow a smaller force to have a greater effect.</p>	<p>Big Idea: A successful trip to Mars requires an understanding of how forces work.</p> <p>How do the ideas we have learnt above forces and space help us understand the problems of a trip to Mars? -</p>	<p>KQ: How do environmental conditions affect growth? Big Idea: There are differences and similarities in the lifecycles of mammals, amphibians, insects and birds</p> <p>Learn about the life cycles of a mammal, an amphibian, an insect and a bird and identify the differences and similarities. Investigate how a bean grows and the factors which influence its growth.</p>	<p>KQ: How does time affect the development of different animals from infancy to old age? Big Idea: Living things use different mechanisms to reproduce</p> <p>Describe the changes as humans develop to old age and give reasons why these changes occur.</p> <p>Compare the reproduction in plants with reproduction in animals (including SRE)</p>
---	---	---	---	--

Science

	Year R	Year 1/2	Year 3/4	Year 5/6
Asking Questions	Engage in open-ended activity Playing & Exploring	<ul style="list-style-type: none"> -Ask simple questions and recognise that they can be answered in different ways -Use simple secondary sources to find answers 	<ul style="list-style-type: none"> -Ask relevant questions and use different types of scientific enquiries to answer them -Start to make their own decisions about the most appropriate type of scientific enquiry they might use to answer questions -Recognise when and how secondary sources might help them to answer questions that cannot be answered through practical investigations 	<ul style="list-style-type: none"> -Use their science experiences to explore ideas and raise different kinds of questions -Recognise which secondary sources will be most useful to research their ideas and begin to separate opinion from fact

	Year R	Year 1/2	Year 3/4	Year 5/6
Planning Tests	Find ways to solve problems, find new ways to do things and test their ideas	<ul style="list-style-type: none"> -Perform simple tests -Suggest some ideas and questions based on simple knowledge and say how they might find out about them 	<ul style="list-style-type: none"> -Set up simple practical enquiries, comparative and fair tests -Suggest questions that can be tested and make predictions about what will happen, some of which are based on scientific knowledge -Design a fair test or plan how to collect sufficient evidence -Recognise when a simple fair test is necessary and help to decide how to set it up 	<ul style="list-style-type: none"> -Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary -Use test results to make predictions and identify when further observations, comparative and fair tests might be needed (and explain which variables need to be controlled and why in a fair test) -Decide how to turn ideas into a form that can be tested and, where appropriate, to make predictions of what will happen based on scientific knowledge and understanding

Science

	Year R	Year 1/2	Year 3/4	Year 5/6
Gathering & Recording	-Develop ideas of grouping, sequences, cause and effect	-Identify and classify -Use simple features to compare objects, materials and living things and with help decide how to sort and group them (identifying and classifying) -Record simple data - With help, record and communicate their findings in a range of ways and begin to use simple scientific language	-Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables -Gather, record, classify and present data in a variety of ways to help in answering questions	-Decide how to record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs

	Year R	Year 1/2	Year 3/4	Year 5/6
Observing & Measuring	Know about similarities and differences in relation to objects, materials and living things Make observations of animals and plants and explain why some things occur, and talk about changes	-Observe closely, using simple equipment (e.g. hand lenses, egg timers to gather data) -use their observations and ideas to suggest answers to questions	-Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers -Begin to look for naturally occurring patterns and relationships and decide what data to collect to identify them	-Choose the most appropriate equipment to take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate -Make their own decisions about what observations to make what measurements to use and how long to make them for

Science

	Year R	Year 1/2	Year 3/4	Year 5/6
Recording/ Presenting/ Reporting	Create simple representations of events, people and objects	<ul style="list-style-type: none"> -Gather and record data to help in answering questions - Talk about what they have found out and how they found it out -Begin to use simple scientific language -Record simple data 	<ul style="list-style-type: none"> -Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions -Talk about criteria for grouping, sorting and classifying; and use simple keys 	<ul style="list-style-type: none"> -Report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations -Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places (Maths)

	Year R	Year 1/2	Year 3/4	Year 5/6
Analysing & Evaluating		<ul style="list-style-type: none"> -Using their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> -Use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions -Identify differences, similarities or changes related to simple scientific ideas and processes -Use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> -Identify scientific evidence that has been used to support or refute ideas or arguments. -Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (Maths)

Science

Scientific Vocabulary	
Year R	<p>Same, different, change, human, senses (see, hear, taste, feel, smell) healthy, exercise, hygiene, body, body parts (arms, legs, etc)</p> <p>Plants, leaves, flowers, grow, seed</p> <p>Seasons, weather,</p> <p>Animals, rainforest, seaside, coast, deserts</p>
Year 1/2	<p>Question, observe, equipment, identify, classify, sort, diagram, chart, map, compare, contrast, describe</p> <p>Year 1</p> <p>Animals Including Humans - amphibians, reptiles; senses – tongue (taste), nose (smell), eyes (vision), skin (touch), ears (hearing); omnivores, carnivores</p> <p>Everyday Materials -wood, plastic, glass, metal, water, rock properties - hard/soft stretchy/stiff shiny/dull rough/smooth bendy/not bendy waterproof/not waterproof absorbent/not absorbent</p> <p>Plants - tree, deciduous, evergreen, trunk, branches, leaves, root, bud, flower, blossom, petals, root, stem, grow, brick paper fabrics elastic foil</p> <p>Seasonal Changes – season, winter, autumn, spring, summer, daytime, weather, sleet, snow, wind, fog, warm, cold</p> <p>Year 2</p> <p>Plants – germination, water, light, suitable, temperature</p> <p>Use of Everyday Materials - wood, metal, plastic, glass, brick, rock, paper, cardboard squashing, bending, twisting, stretching metal - coins, cans, cars, table legs wood - matches, floors, telegraph poles</p> <p>John Dunlop –rubber Charles Macintosh –waterproof fabric</p> <p>Animals Including Humans – offspring, grow, adults</p> <p>Survival – water, food, air, exercise, hygiene nutrition, reproduce, egg, caterpillar, pupa, butterfly, spaw, tadpole, frog, baby, toddler, child, teenager, adult</p> <p>Living Things and Their habitat – habitats, micro-habitats, food-chain, sun, healthy, leaf litter, shelter, seashore, woodland, ocean rainforest, conditions</p> <p>fruit, vegetables, bulb, seed, water, light, suitable, temperature, germination, reproduction</p>
Year 3/4	<p>Working Scientifically - scientific enquiry, comparative and fair test, systematic, predictions, differences, similarities, changes</p> <p><u>Year 3</u> Forces and Magnets – push, pull, magnet, magnetic, attract, repel, magnetic poles, North, South</p> <p>Animals including Humans (Y3) - nutrition, nutrients, carbohydrates, protein, fats, fibre, vitamins, minerals, bones, joints, exoskeleton, hydrostatic, skeleton, vertebrate, invertebrate, muscles</p> <p>Light - reflect, star, shadow, solid, artificial, sunlight</p> <p>Plants - roots, stem/trunk, leaves, flowers, plant life cycle, nutrient, seed dispersal, pollination nutrition, skeleton, muscles organic matter, crystals shadow, reflection</p> <p>Rocks – appearance, physical properties, Properties - hard/soft shiny/dull rough/smooth absorbent/not absorbent fossils - sedimentary, grains, soils - rock, organic matter uses - buildings, grave stones grains crystals</p> <p><u>Year 4</u> changing state degrees Celsius (°C) thermometer water cycle - evaporate, evaporation, condense condensation</p> <p>Temperature - melting, melt ice - warm/cool water - warm/cool water vapour</p> <p>Animals, including Humans - mouth, tongue, teeth, oesophagus, stomach and small and large intestine</p> <p>Sound- vibrate, vibration, vibrating, air, medium, ear, sound, pitch, volume, woodwind, percussion, string, fainter, louder, insulate</p> <p>States of Matter Materials - solidify, solid - iron, ice, melting, freeze, liquid, evaporate, gas, container, condensation, temperature, water vapour</p> <p>Equipment – thermometer, data logger data gather, record, classify, present, evidence, secondary sources, construct, interpret</p> <p>Electricity – appliances, electricity, electrical circuit, cell, wire, bulb, buzzer, electrical safety Insulators – wood, rubber, plastic, glass Conductors – metal water Switch open, close</p> <p>Living Things and Their Habitats – environment, flowering, non-flowering, vertebrate, environment; Vertebrate – fish, amphibians, reptiles, birds, mammals; Invertebrate – snails, slugs, worms, spiders, insects; Plants – flowering plants, non-flowering plants (including mosses, ferns); Human impact – positive e.g. nature reserves, ecologically planted parks; negative e.g. population, litter, deforestation</p>

Science

Year 5/6	<p>Working Scientifically – variables, precision, repeat reading, a fair test, variables</p> <p><u>Year 5</u></p> <p>Living Things and their Habitats – life cycle, pollination, fertilisation, germination, photosynthesis, chlorophyll, stamen, anther, filament, stigma, style, carpel, ovary, ovule</p> <p>Animals including Humans - puberty, life cycle, gestation, foetus, fertilisation, life expectancy, adolescence</p> <p>Forces gravity, resistance (air and water), lever, pulley, friction, inertia, Isaac Newton</p> <p>Earth and Space - Earth, solar system, Sun, Moon, rotation, day & night, star, planet, sphere, orbit, axis, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune, Pluto</p> <p><u>Year 6</u></p> <p>Light - retina, pupil, translucent, transparent, light source, visible spectrum, prism, ray</p> <p>Properties and Changes in Materials - solubility, transparency, conductivity, insulation, dissolve, solution, mixture, insoluble, evaporation, evaporate, condense, melt, reversible changes, irreversible changes, filter, sieving, separate</p> <p>Electricity renewable, non-renewable, electrons</p> <p>Record data – scientific diagrams, classification keys, scatter graphs, further comparative and fair test, causal relationships, explanations, degree of trust</p> <p>Evidence – support, refute ideas, identify, classify and describe, patterns, systematic, quantitative measurements</p> <p>Animals including Humans heart, blood vessels, circulatory system, lifestyle, aorta, vein, artery, carbon dioxide, oxygen</p> <p>Living Things and Their Habitats – reproduction, life cycle, photosynthesis, pollination, germination, fertilization, insect, mammal, classification, microorganisms</p> <p>Evolution and Inheritance – Charles Darwin, adaptation, evolution, offspring, inheritance, variations, habitat, environment, characteristics</p>
