

## Odds and evens

Some of my bracelets have an odd number of beads and some have an even number of beads.

These are called even numbers, and they always end in 24680
36 is an even number.
Odd numbers always end in $13 \begin{array}{lll}3 & 7 & 9\end{array}$ 63 is an odd number.

Chelsea is counting all the bows as she puts them back in the craft drawer.

Write the next even number.
a $\mathrm{O2} \longrightarrow \ldots \ldots \ldots$
e $35 \longrightarrow \ldots \ldots \ldots$
b. $38 \longrightarrow \ldots \ldots \ldots$
f $57 \longrightarrow \ldots \ldots \ldots$
C $46 \longrightarrow \ldots \ldots \ldots$
g. $29 \longrightarrow \ldots \ldots \ldots$
d. $60 \longrightarrow \ldots \ldots \ldots$
h. $87 \longrightarrow \ldots \ldots \ldots$

I've made a game for you using my bead boxes.
Colour pirk the even number path.
