

Practise getting quicker at totalling this week.

Finding totals

Chelsea has so many *lovely things*. I'm helping her tidy her room and we're counting as we go to find out how many types of toys she has. When you *add* sets of objects together, you are finding the total.

4 and 2 makes a total of 6.

Count the tea set to check the answer.

Chelsea has been dressing up and playing with her toys. Find the total for each set. Which set would you pick to play with?

- a. and makes a total of
- b. and makes a total of
- c. and makes a total of

Can you tidy Chelsea's pretty pillows?
Draw extra cushions so each set makes a total of 8.

Love that style!

Finding totals

Chelsea's room is quickly becoming tidy but there's still more to count. When you add together 3 or more numbers, try **starting** with the **largest number**.

Here's how to total
4, 3 and 8:

$$8 + 4 = 12$$

$$12 + 3 = 15$$

You could look for pairs that are easy to total.

Here's how to total 6, 5 and 4:

$$6 + 4 = 10$$

$$10 + 5 = 15$$

Help Chelsea count all the stars and planets on her ceiling. Fill in the totals for these sets of additions.

a.  →

d.  →

b.  →

e.  →

c.  →

f.  →

Fill in the totals for these sets of additions.

a. + +
 + + 5
 + 6 +

+ 3 +
 8 + +
 + + 1

b. + + 9
 + 6 +
 7 + +

4 + +
 + 8 +
 + + 5

Simply fabulous!
