

Lili and Julian each start with the **same** number.

Lili works out **half** of the number.

Julian works out **three-quarters** of the number.

The **sum** of their answers is **275**

What was the number they started with?

$$\frac{1}{2} + \frac{3}{4} = \frac{1}{4}$$

$\frac{1}{4}$ of the number = 275

$$5 \overline{) 2725} \begin{array}{r} 55 \\ 25 \\ \hline 225 \\ 200 \\ \hline 25 \end{array}$$

so $\frac{1}{4} = 55$ $4 \times 55 = \underline{\underline{220}}$
